EDUCATION

San Diego State University

Bachelor of Science: *Computer Science*

Graduation: May 2027

GPA: 3.00

Relevant Coursework: Object-Oriented Programming, Data Structures, Software Systems, Computer Architecture

Academic Clubs: ACM (Association of Computer Machinery), SHPE (Society of Hispanic Professional Engineers), AI Club

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, JavaScript

Deployment & Hosting: Netlify, Render, Vercel, Github Pages

Web Dev: HTML, CSS, TypeScript, Tailwind CSS, React.js, Next.js, Express.js, Node.js

Version Control & Management: Github, Taiga

Databases & Backend: MongoDB, Firebase, PostgreSQL, Azure SQL, ChromaDB

UI/UX & CMS: Figma, Plasmic CMS

AI & Large Language Models: OpenAI API (GPT-4o-mini, Embeddings), LangChain, RAG

PROFESSIONAL EXPERIENCE & LEADERSHIP

Calexico Neighborhood House | [Mission Thrift Store](#) | [Happy Kids Preschool](#) – Calexico, CA (In-Person)

SEO & Digital Marketing Specialist | E-Commerce & Web Optimization

Mar. - June 2025

- Built an inventory system with SKU codes in Google Sheets to track thrift store items in-person and online, integrating listings on eBay, OfferUp, and Shopify.
- Partnered with senior leadership and a remote SEO specialist to launch the store's first steady online revenue stream, generating 30+ sales and ~\$600 profit while sustaining 75% enrollment.

[Sports Excitement LLC](#) – New York, NY (Remote)

Front-End Developer Intern

Dec. 2024 - Mar. 2025

- Developed responsive UI with React.js and Tailwind CSS, translating Figma prototypes into pixel-perfect code—including the login page—for the company's site launch.
- Contributed in a 12+ member Agile team (front-end, back-end, UX, PM, Scrum Master) using Taiga for sprint planning, stand-ups, and task tracking.
- Collaborated via GitHub for version control and code reviews, ensuring smooth integration and high-quality standards.

[Ectron Corporation](#) – San Diego, CA (Hybrid)

Software Engineer Intern (Asset Tracker)

May - Aug. 2024

- Developed the front-end of "Asset Tracker" with React.js, Next.js, and Plasmic CMS, integrating Azure Maps and CSS animations for real-time visualization.
- Led 3 intern engineers as the only full-stack developer, mentoring peers in HTML, CSS, JavaScript, Express.js, and Node.js while guiding backend implementation.
- Collaborated with backend engineers to connect Azure IoT data (tracking 8+ sensors) with Azure SQL, enabling managers to monitor assets and streamline retrieval.

PROJECTS

LLM-Powered Bible Tutor - (Personal AI/LLM Project, In-Progress)

Sept. 2025

- Developed a retrieval-augmented generation (RAG) system with GPT-4o-mini, LangChain, and ChromaDB to query 35,800+ Bible verses, ensuring grounded, citation-based responses.
- Engineered a vector search pipeline (~200ms retrieval, 128k context) and custom prompts, improving factual accuracy by >90% compared to baseline GPT responses.

What's Poppin?: A social-media (Reddit) clone - [Live App](#) | [Github Repo](#) - (Personal Full-stack Project)

Feb. - April 2023

- Built a full-stack social media platform with React.js and Firebase, implementing secure authentication, Firestore data models, and CRUD for accounts, posts, and comments, tested with 15+ accounts.
- Developed voting, threaded replies, and a recursive comment system with 20+ reusable React components, supporting 20+ posts and unlimited nested threads.
- Deployed via GitHub Pages and managed with GitHub (40+ commits), simulating professional workflows.

Blog API - [Live App](#) | [Github Repo](#) - (Personal Full-stack Project)

Nov. - Jan. 2023

- Created a full-stack blog application with a React.js frontend and a RESTful Node.js/Express backend, implementing 10+ endpoints for authentication and CRUD on posts/comments, tested with 15+ accounts.
- Deployed backend on Render and frontend on Netlify, maintaining 40+ GitHub commits with structured routes/controllers for scalable integration.
