EDUCATION

San Diego State University

Bachelor of Science: *Computer Science*

Graduation: May 2027

GPA: 3.00

Relevant Coursework: Object-Oriented Programming, Data Structures, Software Systems, Computer Architecture

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, JavaScript

Deployment & Hosting: Netlify, Render, Vercel, Github Pages

Web Dev: HTML, CSS, TypeScript, Tailwind CSS, React.js, Next.js, Express.js, Node.js

Version Control & Management: Github, Taiga

Databases & Backend: MongoDB, PostgreSQL, Google Firebase, Microsoft Azure SQL

UI/UX & CMS: Plasmic, Figma

PROFESSIONAL & LEADERSHIP EXPERIENCE

Calexico Neighborhood House | [Mission Thrift Store](#) | [Happy Kids Preschool](#) – Calexico, CA (In-Person)

SEO & Digital Marketing Specialist | E-Commerce & Web Optimization

Mar. - June 2025

- Led SEO and digital marketing with the Executive Director, Project Manager, and Preschool Director, refining audience targeting and boosting brand visibility.
- Directed high-budget radio and online campaigns targeting women ages 23–48, retaining 75% of students during summer when enrollment typically dropped by 50%.
- Built an inventory management system with SKU codes in Google Sheets, streamlining in-person and online tracking of items; partnered with a remote SEO/e-commerce specialist to launch the store's first steady online revenue stream, generating 30+ sales and ~\$600 profit.

[Sports Excitement LLC](#) – New York, NY (Remote)

Front-End Developer Intern

Dec. 2024 - Mar. 2025

- Developed and optimized responsive UI components with React.js and Tailwind CSS—translating Figma prototypes into pixel-perfect, production-ready code including the login page—contributing to the release of the company's site with seamless cross-device performance.
- Collaborated in a cross-functional Agile team of ~12+ members—including two other front-end developers (one lead), five back-end engineers, ~5 UX designers, a project manager, and a scrum master—using Taiga for sprint planning, daily stand-ups, and task tracking to ensure on-time feature delivery.
- Collaborated with front-end and back-end teams through GitHub for version control and code reviews, ensuring smooth integration and maintaining high-quality standards across the development lifecycle.

[Ectron Corporation](#) – San Diego, CA (Hybrid)

Software Engineer Intern (Asset Tracker)

May - Aug. 2024

- Developed the front-end of "Asset Tracker" with React.js, Next.js, and Plasmic CMS, integrating Azure Maps and CSS animations to display real-time asset locations with an intuitive user experience.
- Led a team of three intern engineers as the only full-stack developer, mentoring peers in HTML, CSS, JavaScript, Express.js, and Node.js while guiding backend implementation for seamless integration.
- Collaborated with backend engineers to connect Azure IoT sensor data with an Azure SQL database, enabling managers to track assets across buildings and streamline employee item retrieval.

PROJECTS

What's Poppin?: A social-media (Reddit) clone - [Live App](#) | [Github Repo](#)

(Personal Full-stack Project) **Feb. - April 2023**

- Designed and built a full-stack social media platform (personal project) with React.js and Firebase, implementing secure email authentication, scalable Firestore data models, and full CRUD operations for accounts, posts, and comments.
- Developed core social features—including posts, voting, comments, and threaded replies—supported by a recursive React.js comment system and 20+ modular components for scalability and maintainability.
- Deployed the platform via GitHub Pages for public access and leveraged GitHub for version control, simulating professional workflows with documented commits and structured updates.

Where's that Pokemon? - [Live App](#) | [Github Repo](#)

(Personal Full-stack Project) **Nov. - Jan. 2023**

- Developed an interactive image-tagging game using React, JavaScript, and CSS, featuring randomized character placement across three levels to ensure unique gameplay in 100% of sessions.
- Engineered leaderboard functionality with Firebase Database and CRUD operations, tested with 20+ usernames, enabling score recording and dynamic top-ten rankings per level.
- Deployed the application via Netlify and maintained development through GitHub version control with 50+ documented commits, demonstrating end-to-end delivery of a production-ready web application.
