PROFESSIONAL EXPERIENCE

Calexico Neighborhood House | Mission Thrift Store | Happy Kids Preschool – Calexico, CA (In-Person)

SEO & Digital Marketing Specialist | E-Commerce & Web Optimization

Mar. 2025 - June 2025

- Led SEO and digital marketing initiatives to increase visibility and drive sales for Mission Thrift Store and boost preschool enrollment for Happy Kids, using Google Analytics to identify high-performing content and audience engagement trends.
- Maintained and organized physical inventory, coordinated with remote Shopify developers to ensure accurate listings, and implemented new inventory management practices to streamline tracking and improve operational efficiency.
- Directed high-budget local advertising efforts, including radio promotions and online campaigns, ensuring strategic placement and messaging to maximize return on investment.
- Collaborated in-person with marketing teams to promote preschool services across social platforms, tailoring content to target specific parent demographics based on data insights and keyword performance.

Sports Excitement – New York, NY (Remote)

Front-End Developer Intern

Dec. 2024 - Mar. 2025

- Developed and optimized responsive UI components using React.js and Tailwind CSS, improving engagement and ensuring a seamless cross-device experience.
- Translated Figma design prototypes into production-ready React.js components, maintaining pixel-perfect accuracy and enhancing usability.
- Collaborated with cross-functional teams (front-end, back-end, UX/UI, and marketing) using Agile methodologies - actively participating in Scrum ceremonies such as daily stand-ups and sprint planning.
- Improved project delivery efficiency by utilizing Taiga for task tracking, ensuring on-time feature releases and smooth development workflows.

Ectron Corporation – San Diego, CA (Hybrid)

Software Engineer Intern (Asset Tracker)

May 2024 - Aug. 2024

- Designed and built a dynamic React.js and Next.js front-end enhancing user experience through Plasmic Studio and interactive Azure Maps for real-time Asset tracking.
- Optimized live asset monitoring using CSS animations, enhancing data visualization accuracy and improving user engagement.
- Led and mentored team members on Express.js and Microsoft Azure SQL development, ensuring seamless front-end and back-end integration for efficient data management.

PROJECTS

What's Poppin?: A social-media (Reddit) clone - [Live App](#) | [Github Repo](#)

- Designed and built a full-stack social media platform using React.js, Firebase Auth, and Firebase Database, enabling seamless user authentication and secure account creation via email.
- Implemented content-sharing features, allowing users to post images, links, and text while fostering engagement through a voting system, comments, and threaded replies.
- Engineered a recursive comment system using React.js components, leveraging Firestore's schema-less structure for efficient nested data management and dynamic rendering.
